

The census taken in 1841 was the first surviving detailed record of the population of the country. It was arranged by household, although the relationship of each member to the head of the family was not recorded. The ages of people over 15 were recorded down to the nearest five, so that the population could be classified in age bands. Thus, someone whose age was recorded as 40 could have been 41, 42, 43 or 44 (assuming, of course, that they knew their correct date of birth). Many people could not read nor write and, if their parents were no longer alive, their ages were, in many cases, a best estimate. The occupation of each person was noted, in succinct form, which took no account of dual occupation. The final column did not record place of birth, but merely noted whether the person was born in the same county as their then residence. In this respect it should be remembered that at the time of the census Chardstock formed part of the County of Dorset, as the transfer to Devon did not occur until 1896.

Because the 1841 census was taken on 6th June, some itinerant harvest workers were sleeping rough and were not recorded. It was decided that all subsequent ten year censuses would be held on a Sunday in late March or early April.

An analysis of the recordings for Chardstock are tabled below:

| <b>Age Group</b> | <b>No. of persons</b> | <b>Percentage</b> |
|------------------|-----------------------|-------------------|
| Under 10         | 357                   | 25.5              |
| 10 to 19         | 302                   | 21.6              |
| 20 to 29         | 191                   | 13.6              |
| 30 to 39         | 166                   | 11.9              |
| 40 to 49         | 135                   | 9.6               |
| 50 to 59         | 102                   | 7.3               |
| 60 to 69         | 73                    | 5.2               |
| 70 to 79         | 59                    | 4.2               |
| Over 80          | 16                    | 1.1               |

The most apparent feature is the high proportion of children in the Parish with a quarter of the population being under 10 and nearly a half (47%) being under 20. The total population was just over 1400 and the overall average age was under 30.

The large difference in the 10 to 19 and 20 to 29 age groups (302 compared with 191) suggests that upon reaching adulthood a significant number of people left to find work elsewhere. This is not surprising given the high birth rate and the limited employment prospects in the Parish. The average occupancy of each household was just over five. The population was divided 47.7% male/52.5% female, with females outnumbering males by about 30.

Life expectancy was much lower than modern times with only 5% of the population being 70 or over and just 1% being 80 or over. The oldest person, by a margin of 13 years, was Mary Keech (or Keetch) with a recorded age of 98, although the previous year two other ninety year olds had died - Robert Somers aged 90 in September, 1840 and Elizabeth Backalor aged 96 of Bewley Down in April, 1840.

The Census recorded 273 dwelling houses and 15 uninhabited houses.

The following transcript was made by members of CHRG from copies of the original documents. When extracting information from this transcript, the following points should be noted:

Abbreviations are used for the occupations of householders as follows:

|          |   |
|----------|---|
| Ag Lab   | Agricultural labourer: usually a married man who was paid a daily or weekly wage for the job he performed, sometimes living in a tied cottage   |
| Ap       | Apprentice  |
| Black S  | Blacksmith  |
| (f)      | Note added to indicate a female christian name  |
| F S      | Female servant: usually a person who entered domestic service as a young teenager and continued in such employment until marriage.<br>On farms some female servants might have been employed as dairymaids. |
| Ind      | A person living by independent means  |
| (m)      | Note added to indicate a male christian name  |
| m        | Age in months   |
| M        | Maker (e.g. Basket Maker, Shoe Maker, Cabinet Maker)  |
| M S      | Male servant: normally an adolescent boy or unmarried man who was hired for a year and lived on the premises of his master.<br>In Chardstock most male servants worked on farms.                            |
| P or Pen | Pensioner   |

Shortening of Christian names has been avoided wherever possible with full names being given in the transcription; the only exception being "Jos", as this could refer to either Joshua or Joseph. Also, full stops have not been used in names, thus Wm. C. Larcombe in the census return appears as William C Larcombe. This measure is designed to assist word search software programmes.

In cases where other research has produced an alternative to the transcribed version, that alternative is shown alongside the transcribed version in [ ] brackets, provided the alternative has an equal or greater likelihood of being the correct or preferred version.

**DISTRICT 10 DESCRIPTION**

All that part of the parish lying on the right or East side of the Turnpike Road leading from Axminster to Chard and all that part of the parish lying on the left or west side of the said Turnpike Road leading from Axminster to Chard, to the road leading over Higher Coaxdon Common by the Fir pound from Grubhams Gate to the Church hill, including the House standing opposite the bottom of the Lane.

| Address (if given) | Forename  | Surname  | Age | Occupation | B. in County |
