

The census was carried out on the night of 30th March, 1851 and contained considerably more information than the return taken ten years earlier. The head of the family had to be defined as did the relationship to the head of each person staying in the house that night. The sex of each person was also recorded. Accurate ages were required throughout and were taken from the person's last birthday. For infants under one year, the age was recorded in months (indicated in the transcript by the use of m for month e.g. under 1m, 5m, etc.). The rank, profession or occupation of each person was recorded and there were extensive guidelines printed on the form advising people how to complete this section. "Where born" had to be completed by giving the county first, followed by the town or parish of birth, and finally, there was a separate column to record any persons who were deaf-and-dumb or blind.

It should be remembered that at the time of the census Chardstock formed part of the County of Dorset, as the transfer to Devon did not occur until 1896.

Any person refusing to give correct information was liable to incur a penalty of £5.

An analysis of the recordings for Chardstock are tabled below, together with a comparison with 1841:

Age Group	1841 Census		1851 Census	
	No.	%	No.	%
Under 10	357	25.5	360	25.6
10 to 19	302	21.6	284	20.5
20 to 29	191	13.6	186	13.4
30 to 39	166	11.9	154	11.1
40 to 49	135	9.6	146	10.5
50 to 59	102	7.3	112	8.1
60 to 69	73	5.2	73	5.3
70 to 79	59	4.2	55	4.0
Over 80	16	1.1	16	1.5
Total	1401		1386	

The most apparent, and perhaps surprising, feature of the two returns is how little difference there is between them. Evident is the high proportion of children in the Parish with a quarter of the population being under 10 and nearly a half being under 20. The total population was effectively static with a difference of less than 1% between the two censuses. For both returns the overall average age was under 30.

The large difference in the 10 to 19 and 20 to 29 age groups suggests that upon reaching adulthood a significant number of people left to find work elsewhere. This is not surprising given the high birth rate and the limited employment prospects in the Parish.

In the Census only 21 people were recorded as having been born outside the adjoining counties of Devon, Dorset and Somerset and that 12 of this total of 21 were associated with either the school or the church.

The greater detail in the 1851 census recorded a total of 295 households living in 252 dwellings with one in every six dwelling being occupied by two or more households (31 cases of two households and 6 cases of three households, including one of 6 adults and 14 children from three households living together in the same cottage). Averages were 4.7 persons per household and 5.5 persons per dwelling. Also recorded were 7 uninhabited dwellings and a house being built at Alson. The population was divided exactly evenly between males and females.

Life expectancy was much lower than modern times with only 5.5% of the population being 70 or over and just 1.5% being 80 or over. The oldest person was James Horner, aged 93 and a blind pauper, living at Furnham with his 83 year old wife Jane.

The following transcript was made by members of CHRG from copies of the original documents. When extracting information from this transcript, the following points should be noted:

The Parish of Chardstock was subdivided into three Enumeration Districts (nos. 1a, 1b and 1c). The return for each Enumeration District was compiled by a different person and this resulted in a lack of consistency; for example the return for District 1c spells Henry as Henrey and for District 1b, where when no occupation is provided, the “gap” is usually filled by repeating the relationship of that person to the head of the family.

For the “Relation To Head” column the following relationships are given in full - Wife, Son, Mother, Father, Brother, Sister, Aunt, Uncle, Nephew, Niece, Cousin, Lodger, Relation, Visitor and Neither, whereas abbreviations are used for the following:

Dau	Daughter
Gson	Grandson
GDau	Granddaughter
SonLaw	Son-in-Law
DauLaw	Daughter-in-Law
MothLaw	Mother-in-Law
FathLaw	Father-in-Law
BroLaw	Brother-in-Law
SisLaw	Sister-in-Law
Appren	Apprentice
Hkeeper	Housekeeper
Serv	Servant

Shortening of Christian names has been avoided wherever possible with full names being given in the transcription; the only exception being “Jos”, as this could refer to either Joshua or Joseph. Also, full stops have not been used in names, thus Wm. C. Larcombe in the census return appears as William C Larcombe. This measure is designed to assist word search software programmes. By the same logic the “Birthplace” is given in full, whenever possible.

A recurring problem in the census return is the treatment of “three generation” families. These should have been shown either as two separate households, each with a head of the family, or as a single family, with a single head, to whom each member of the household is related. There are many examples where the census return has been incorrectly completed. “Notes” have been added to correct any obvious errors and to identify multi-occupancy dwellings.

In the transcription the column headed “Condition” in the census return uses the abbreviations M for Married, U for Unmarried and W for Widow or Widower.

In cases where other research has produced an alternative to the transcribed version, that alternative is shown alongside the transcribed version in [] brackets provided the alternative has an equal or greater likelihood of being the correct or preferred version.

To save space and achieve consistency, the “Chapman County Code” system has been used to indicate the county of birth. The codes used in this Census are listed below:

George Perham is described in the return as House Servant and Ag. Lab. Jesse Perham has had "Engineer's son" added after the return was submitted, but this is clearly incorrect, as he is the son of George Perham and not William Webb)
